# Frontend Development Task - Player Stats Card

## Introduction »

The purpose of this exercise is to demonstrate your ability to use front-end languages to build a data driven component of a website.

## Task »

In undertaking this task, **please consider the following:**

- Semantic and accessible mark-up
- CSS produced using SASS
- Concise Javascript solution
- Avoid using jQuery or an application framework
- NodeJS for build/task workflow
- Future reuse and extension of code
- Any documentation / notes on build

Using the provided design and assets, available here ...

<https://www.dropbox.com/sh/9s5cd2qlx84ydbo/AABWt55t-C-j3nCxCfKDD7koa?dl=0>

... build a stats card component to function and display accurately in Chrome, Firefox and Edge. The user is expected to be able to select from a list of players to view the relevant stats for that player.

On completion the source files for the build should be provided, with any relevant setup instructions.
